

# COVID-19 Quarantine Guidance for General Public

Quarantine separates people who were exposed to a contagious disease to see if they become sick.

START ----->

Were you within 6 ft. or less of a positive case for more than 15 minutes, within 48 hours prior to their symptoms beginning or testing positive?

Yes

No

You are not considered a close contact and can resume normal activities. If symptoms occur, get tested.

Are you vaccinated?

Yes

No

Quarantine for 5 days. Day 0 is the day in which you were around the positive case. You must wear a mask around anyone for an additional 5 days. If symptoms occur, get tested.

Did you receive a booster shot?

Yes or N/A\*

You do not have to quarantine. Wear a mask for 10 days following exposure. Best practice would include being tested 5 days after exposure or at first sign of any symptoms.

No

Has it been more than 6 months since your last Pfizer or Moderna vaccine or more than 2 months since your last J&J vaccine?

Yes

Quarantine for 5 days. Day 0 is the most recent day in which you were around the positive case. You must wear a mask around anyone for the next 5 days. If symptoms occur, get tested.

No

You do not have to quarantine. Wear a mask for 10 days following exposure. Best practice would include being tested 5 days after exposure or at first sign of any symptoms.

# COVID-19 Isolation Guidance for General Public

Isolation separates sick people with a contagious disease from people who are not sick.
